H20 CHLORINATION INC. DOUGLAS HOFFMAN 3643 450TH AVENUE PO BOX 78 EMMETSBURG IA 50536

Re: Description: WATER TREATMENT CHEMICAL INJECTION DEVICE - POE

Manufacturer: H20 CHLORINATION INC.
Product Name: WELL PRO CHLORINATOR
Model Number(s): WP1, WP2, WP3 AND WP4

Product File No: 20120402

The specifications and/or plans for this plumbing product have been reviewed and determined to be in compliance with chapters SPS 382 through 384, Wisconsin Administrative Code, and Chapters 145 and 160, Wisconsin Statutes.

The Department hereby issues an approval based on the Wisconsin Statutes and the Wisconsin Administrative Code. This approval is valid until the end of February 2018.

This approval supersedes the approval issued on April 25, 2007 under product file number 20060466.

This approval is contingent upon compliance with the following stipulation(s):

- If these approved devices are modified or additional assertions of function or performance are made, then this approval shall be considered null and void, unless the change is submitted to the department for review and the approval is reaffirmed.
- These products have undergone sufficient testing to document their ability to properly inject a chemical into a water supply system as specified in this approval letter.
- Only dry chlorine pellets, Environmental Protection Agency Registration number 50510-1, weighing 0.79 grams, 11/32-inches in diameter, may be used with this product.

The Well Pro calcium hypochlorite pellets are listed under ANSI/NSF Standard 60 and their maximum use concentration is 14.0 mg/l. However, the USEPA has established a maximum residual disinfectant level goal (MRDLG)/maximum residual disinfectant level (MRDL) of 4.0 mg/l for the purpose of minimizing the formation of disinfection byproducts (DBP's). Therefore the free chlorine residual in potable water via the use of these devices shall not exceed 4.0 mg/l.

- For buildings not served by a municipal water supply, Department of Natural Resources (DNR) written approval may be required prior to installation of this product to inject a chemical into a water supply system. For more information contact the DNR Private Water Systems Section, P.O. Box 7921, Madison, WI 53707, telephone (608) 266-3415.
- Review the following Wisconsin Department of Natural Resources publications prior to installing, using or otherwise chlorinating a well within the Arsenic Advisory Area:
